PROJECTS

MyOnlineMeal
□ This project is a food ordering website platform that allows customers to place online orders for food delivery from restaurants. The key features of such a website include Restaurant listing, menu display, Order placement, Payment processing, and Customer support. The design and functionality of the website can be customized based on specific requirements.

To-Do List
□ This project allows users to manage their tasks. It's a list of tasks you need to complete or things that you want to do and after completing the task we can sort according to their preferences. After completing the task, we can clean them.

News-Boi
□ This news app can be used to grab quick daily news bites which can deliver the news in a different format than television and we can directly ping to your favorite choice of news like: - sports, technology and health, etc...
